Keor SPE Tower 1500

3 110 62

1. GENERAL FEATURES

The Legrand UPS Keor SPE Tower 1500 model is an uninterruptible power source with interactive line technology and sinusoidal output. It delivers a rated power of 1500VA – 1200W, is managed by a microprocessor, is equipped with integrated self-diagnostics and works on cold-start.

Keor SPE Tower 1500 is internally equipped with valve-regulator, hermetically sealed, lead accumulator batteries to guarantee a minimum uptime of 4 minutes at 80% of the load. The batteries can be easily replaced thanks to a specific door located on the front of the UPS.

The presence of an electronic stabilizer (AVR) inside the UPS provides the connected loads with effective protection against any interference in the electrical mains.

This UPS has 2 x (4 x IEC 320-C13) output sockets and 1-group can be programmable.

Keor SPE Tower 1500 can be connected to a PC through the SNMP, USB and Serial RS232 port allowing you to monitor its operation, thanks to the free software, and carry out an emergency shutdown of Windows and Linux operating systems.

Through the 5-button control panel, the LCD screen and 3 status LED Bar:

· GREEN: Everything is OK on UPS. Load is protected.

- YELLOW: The load is supplied by UPS, but an alarm is active, control is required.
- RED: The load is not supplied by UPS. Emergency exists.

LCD display:

Operation Mode

- Measurements
 - a) Input & Output Voltage-Frequency
 - b) Active & Apparent Power
 - c) Load Percentage
 - d) Battery Voltage
 - e) Battery Percentage
 - f) Back-up time
 - g) Environment Temperature
- Alarms & Errors

The Keor SPE Tower 1500 Static Uninterruptible Power Supply bears the CE marking, pursuant to Directives 2014/35 e 2014/30, and is designed and built in compliance with the following standards:

- EN 62040-1 "General and safety requirements for UPSs used in areas that are accessible to the operator"
- EN 62040-2 "Electromagnetic Compatibility requirements (EMC)"

• EN 62040-3 "Performance and test method requirements".

*This value is based on data collected from a technological channel operating on an industrial basis. It does not prevalidate the effective use of this channel for end-of-life of this product.

2. TECHNICAL FEATURES

General Features		
Nominal power (VA)	1500	
Active power (W)	1200	
Technology	Line-interactive VI	
Waveform	Sinusoidal	
Input		
Input voltage	input@AC mode; 1.18*Vin@AVR boost; 0.85*Vin@AVR buck; 230Vac±10%@Battery mode	
Input frequency	47-63Hz (50/60Hz auto-sensing)	
Input Voltage Range	Nominal: 230 / Range: 175 - 288 @ full load	
Input Connection	10A IEC 320-C14	
Output		
Output voltage	230, adjustable to 200/208(output capacity derating to 90%)/220/230/240	
Output frequency (nominal)	50 or 60Hz +/- 0,5 %	
THD Output voltage	< 3% with linear load	
Outlets	2 x (4 x IEC 320-C13) (1-group programmable)	
Batteries		
Number of batteries	3pcs VRLA (Front-access, hot swappable)	
Number of batteries	3pcs VRLA (Front-access, hot swappable) 12V. 9Ah	
Number of batteries Battery series Type/Voltage	1 X , 11 /	
Number of batteries	12V, 9Ah
