UPservice

The new smart tool for electrical infrastructure components

legrand®

UPservice.
More than an App.

UPservice is a platform for web and mobile, developed to assist the electrical installation professionals with smart tools across the UPS life cycle. The expert will have a workspace where to keep track of his installations, access to all product documentation and an up-to-date agenda with maintenance tasks.

Add. Install. Maintain.
Simplifies all the activities.
All just a click away.

UPS

Exclusive features

PRODUCT DOCUMENTS

All up-to-date product documents displayed in one place.

- User manuals
- Datasheet
- Standards Certificates
- Brochure

... and more

MAINTENANCE PLAN

A customized preventive maintenance plan to best maintain your devices. Option to schedule additional operations according to product needs for an easy management of installations.

AR TOOL

Installation support through an Augmented Reality tool, that offers an immersive experience in the step-by-step guided installation.

DIRECT CONTACT

Direct contact with the country Service for any information and support. Simply go to the maintenance area to get in contact with our experts.

Exclusive features

PERSONAL AGENDA

A personal agenda with standard or customized maintenance reminders for installed systems. Periodic notifications with the main tasks to organize and schedule your work in time.

QUALITY TRACEABILITY

Control of the product throughout its operational life. Easy product traceability to assist you with updates and replacements to guarantee the highest product and service quality.

WEBSITE | VIDEO | WEB APP

UPservice allows you to...

Reduce time of all operations by half

Thanks to the direct access to all product documentation, the step-by-step support during the product installation and the maintenance reminders, UPservice helps saving time during all the operations.

WEBSITE | VIDEO | WEB APP

Have all the information in your hand

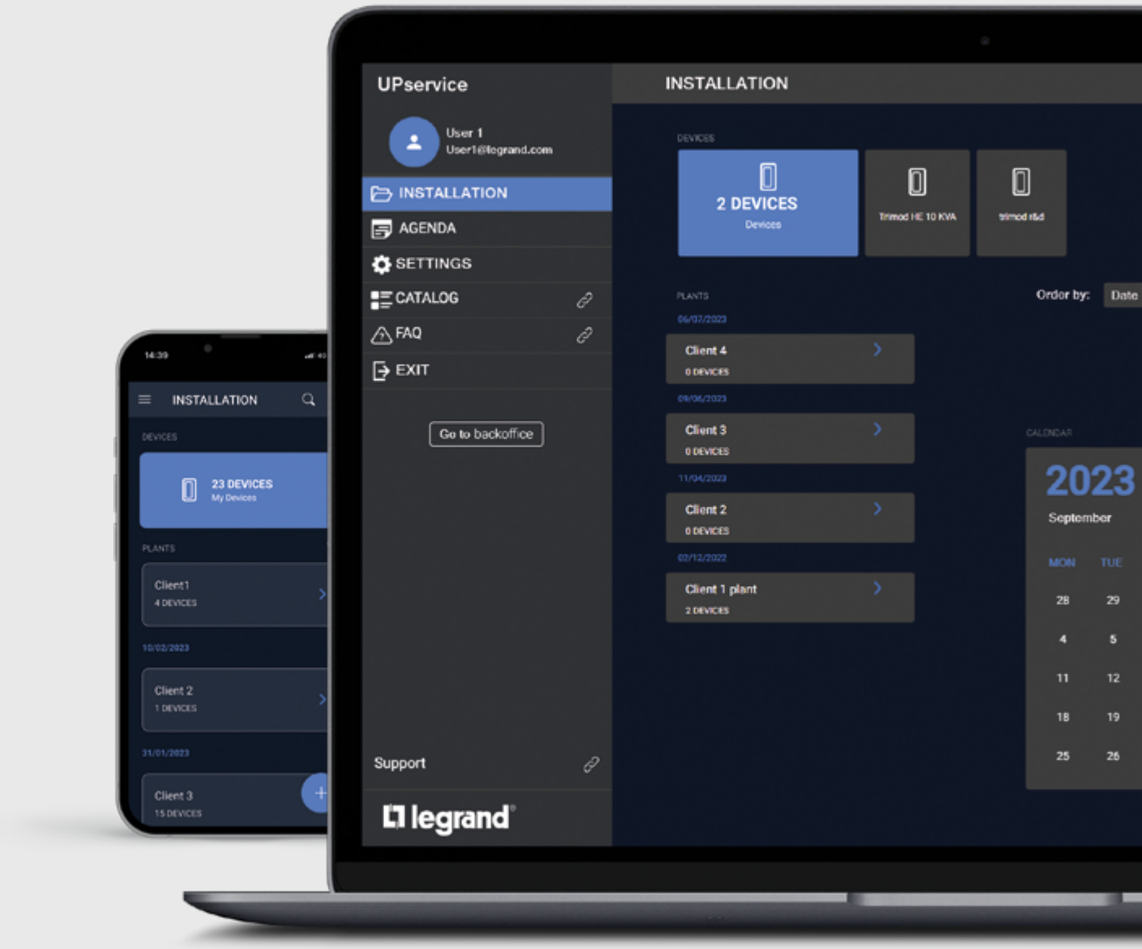
UPservice assists in the management and maintenance of registered installations. An intelligent tool that allows access to information and documentation at any time from anywhere.

UPservice allows you to...

CSR

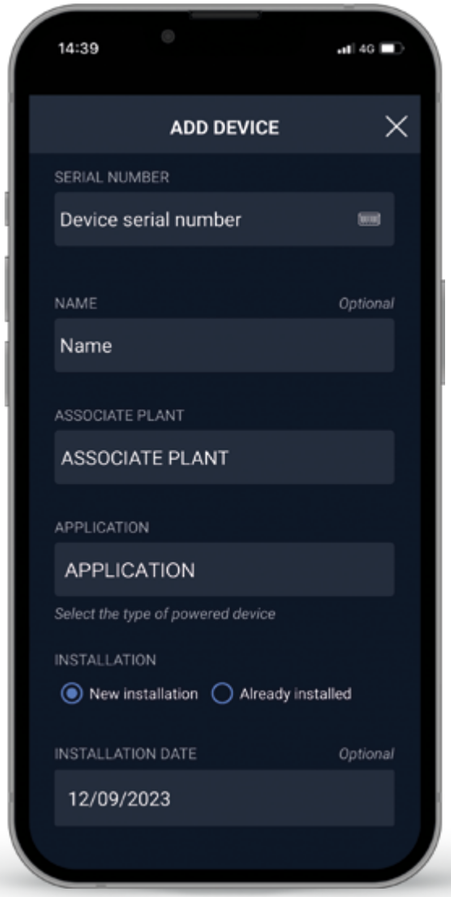
Reduce all the paper information by roughly 30%

UPservice contains all the product documents in an electronic format. A practical action in line with the Legrand Corporate Social Responsibility commitment.



Add.

Quickly add all your devices and **create a personal database of installations.** This function is made even more optimized thanks to the automatic recognition of the bar code related to the product Serial Number on the new device to be added.



WEBSITE | VIDEO | WEB APP

Install.

Install your devices with an **innovative Augmented Reality tool**, which will guide you step by step through the correct installation of the product.
Frame the detail shown on the screen, follow the instructions and reduce the overall operation time.

WEBSITE | VIDEO | WEB APP

Maintain.

Organize your daily work with the maintenance plan created for your product. **Schedule interventions in the agenda, add personalized reminders or get in direct contact with the country service.**
